

Environmental Policy

Six Cylinder Limited believes that businesses are responsible for achieving good environmental practice and operating in a sustainable manner.

We are therefore committed to reducing our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods.

It is our priority to encourage our customers, suppliers and all business associates to do the same. Not only is this sound commercial sense for all; it is also a matter of delivering on our duty of care towards future generations.

Our policy is to

- Advise our clients on what we believe to be the most robust methods to reduce the operational environmental impact of their buildings.
- Wholly support and comply with or exceed the requirements of current environmental legislation and codes of practice.
- Minimise our waste and then reuse or recycle as much of it as possible.
- Minimise energy and water usage in our buildings, vehicles and processes in order to conserve supplies, and minimise our consumption of natural resources, especially where they are non-renewable.
- Prioritize walking and cycling as a means of transport, as first options, and otherwise use public transport wherever possible, before resorting to using taxis, flights or private cars. We further endeavor to consolidate travel for multiple clients, whenever possible.
- Purchase products and services that do the least damage to the environment and encourage others to do the same. This includes purchasing second-hand, refurbished, and recycled goods, wherever possible.
- Assess the environmental impact of any new processes or products we intend to introduce in advance.
- To review and revise this policy, annually.
